Five-Tower Combined Play Structure - Tall
VVZ-VZ5-002-10-T

VVZ-VZ5-002-10-T Five-Tower Combined Play Structure - Tall

A five-tower combined play structure. The central tower features ramparts, and four low towers are connected by a rope bridge, a rope balance bridge, a diagonal rope wall, and a tunnel. The structure includes steps, a sloped climbing wall, a vertical climbing wall, a sloped rope net, a vertical rope net, and three slides. Its striking design invites children to play from a distance. The steel structure is weather-resistant thanks to galvanising and a durable powder-coated finish. The HPL panels used are chemically resistant, UV-resistant - color-stable, non-toxic, recyclable, and resistant to breakage, so there is no risk of injury to children from sharp edges or splinters. The ropes are made of polyester fibers wound around a central reinforcement. This rope construction increases strength and resistance to mechanical wear. Polyester itself is resistant to microorganisms and weathering, dries quickly after rain, is color-stable, and offers high strength. All joints are made of stainless steel and covered with plastic protective caps to increase durability and safety.

Specifications

The Five-Tower Combined Play Structure - Tall VVZ-VZ5-002-10-T is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	8.00 x 5.80 x 3.10 m (L x W x H)
Max. Fall Height:	up to 0.99 m
Safety Surfacing Area:	11.40 x 8.80 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, HPL, LDPE, corrugated pipe, polypropylene rope, stainless steel fasteners
Weight:	830 kg
